

# 2013

2013年4月 パイオニアキッズの第一号園として菊野台園が開園。庭のコンセプトは生物多様性ということで、ビオトープ（やごが生息しとんぼになり、とんぼが蚊を食べる）を作る。鳥がくる庭として水飲み場になる。畑作り、土作りから作物を育て収穫して園の台所で調理していただく。もみじや桐の木から葉っぱの色で、日本の四季が見てわかるように植える。雨水を大地に還すために雨水浸透ますを設置。目標4 自然教育、6 水

April 2013

Kikunodaien was opened as its first nursery center of Pioneer Kids. The concept of its garden is biodiversity and a biotope was created, where dragonfly larvae live and dragonflies feed mosquitos. Birds also visits there to bath and drink water. We cultivated the land and started to make soils to raise vegetables, harvest to cook in our kitchen and serve for the children. We planned trees of a Japanese maple and a paulownia so that children can discern the changing seasons by seeing the colors of their leaves changing. We also installed rainwater permeable pits to return the rainwater to the earth.
